

Extensions & Apps Development for Dynamics 365, Enterprise Edition Workshop

Since the introduction of Microsoft Dynamics AX, modifications have involved the use of either overlaid code or Extensions. While overlaid code is the common approach to customization, it is often the source of frustration when moving from one release to the next due to the expensive development time required for conflict resolutions, testing, etc. To stem these undesirable factors, all solution modifications in Dynamics 365 for Finance and Operations [Enterprise Edition] will only be possible through Extensions.

Stay ahead of your competition! Master how to plan and develop throughout the complete Extensions model and how to best move solutions with overlaying code to Extensions:

2 days of Getting Hands-On Extensions

During this two-days Extensions and Apps Development for Dynamics 365 [Enterprise Edition] Workshop for developers, created by 1ClickFactory, you will learn all about Extensions and App Development, including a LIVE hands-on workshop component to test your learnings.

This exclusive workshop will cover:

- Be introduced to Extensions in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition product.
- Gain on-hand experience in creating Metadata and Code extensions in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition.
- Be introduced to the newest extensibility techniques in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition product.
- Get to know the basic technical principle on how an overlaid Microsoft Dynamics 365 for Finance and Operations, Enterprise edition solution is moved to extensions.

The training is a mix of presentations, discussion and practical tasks.

Get a head and start investing in your Apps Development and Extensions knowledge today and differentiate in the market!

Recommended attendees: experienced Microsoft Dynamics AX developers and technical consultants.

Workshop outcome: Based on this course, participants will get full and deep technical knowledge of extensibility features in the new Microsoft Dynamics 365 for Finance and Operations, Enterprise edition product. They will gain hands-on experience in extension based development related areas in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition.

Workshop prerequisites: Participants should have basic development in Microsoft Dynamics 365 Finance and Operations, Enterprise edition skills. Every participant should have a working Microsoft Dynamics 365 for Finance and Operations, Enterprise edition development environment. In case it is necessary, 1ClickFactory can help the participants to obtain a working development environment.

"We are experiencing the period of transition, when each release of the solution changes the fundamentals of how you run your projects. We at 1ClickFactory aim to help you understand this transition and evolve with confidence, speed and profitability" Ignas Stočkus, the instructor

About instructor

The workshop will be delivered by Ignas Stočkus, a devoted Microsoft Dynamics AX professional. In the last few years Ignas added one more competency next to his development projects and started a carrier as an instructor. Up to this date, Ignas has delivered a significant number of deep hands on workshops on Dynamics AX Introduction as well as Advanced Development, and more than 100 AX developers and programmers evaluated these workshops with the highest ranks.

About 1ClickFactory

1ClickFactory is the leading Dynamics Upgrade Center that is specialized in developing and upgrading Microsoft Dynamics solutions exclusively through Microsoft Dynamics partners. The 1ClickFactory team of developers has more than 15 years of international experience developing on Microsoft Dynamics platforms. Not only they have developed valuable upgrade methodologies and tools that can simplify the upgrade process and reduce the TCO of Microsoft Dynamics solution maintenance in the future, but also were one of the first companies to start investing in Extensions and Self-Provisioning on Cloud knowledge.
