

“

We found what we were looking for: a partner to support us in every aspect of the upgrade process, from the Classic to RTC environment of Dynamics NAV. From the very first meeting to the final delivery of our ISV solution “incadea.fastfit”, everyone involved in the project was extremely professional.

- Georg Mundschoetz, Sales Director, Incadea BSS

As an ISV, you need to plan to upgrade your IP and Add-ons to extensions to enable your solution for Cloud scenarios. Collaborating with 1ClickFactory will allow you to transform your Add-on to Extension in the most efficient way, minimizing the risks and the investment.

Collect the Benefits

Careful planning

Fixed pricing

All IP Belongs
the ISV

Profound NAV and
Extensions technol-
ogy expertise

Proven
Methodology

Experience the value

Careful planning

Project scoping and planning workshop helps you to understand the direct limitations of the Extensions technology (knowledge transfer from 1ClickFactory to Partner) and provides suggestions on what architectural solutions could be used to resolve these. You leave the workshop with a plan on how to transform to Extension technologically with a clear understanding on the required efforts (e.g. time, competency, investment).

Fixed pricing

Once the scope workshop has been conducted, 1ClickFactory will define a scope document and fixed price proposal. Or in the case of larger projects discuss alternate project models (e.g. agile with budget or waterfall with fixed price).

All IP Belongs the ISV

All work/IP that 1ClickFactory performs for the ISV on the ISV solution remains under the ownership of you, the ISV, not 1ClickFactory.

Profound NAV and Extensions technology expertise

Since projects rely on people, we take it as a first priority to assign certified professionals with extensive product knowledge to manage the project. 1ClickFactory has 7 years of experience working with ISVs to upgrade, localize, integrate and develop Microsoft Dynamics ISV solutions. 1ClickFactory performs hundreds of projects during the year. Such experience allows us to plan, speed up the project, and anticipate and overcome potential obstacles by applying best practices.

Proven Methodology

Depending on the project's complexity, 1ClickFactory ensures that a certain methodology model is applied that has been well-proven over time. It assures that the project's scope and costs are controlled, risks are reduced, partners' expectations are managed, and overall clarity is established.

Why 1ClickFactory?

At 1ClickFactory, we specialize in developing automated software services that were previously executed manually, like Microsoft Dynamics solutions upgrades, reports transformation, deployment on Microsoft Azure, and other. By utilizing our services, Partners from around the world can more easily, profitably, and with less risk implement and service Microsoft Dynamics solutions for their customers and quickly scale their businesses. Most of our services are available online and 24/7 through our website.
