

We're looking for a

Senior Dynamics 365/ NAV developer

1ClickFactory is the leading Dynamics cloud software factory and one of the largest providers of NAV on Azure services in the world. We're also a Microsoft ISV Development Center (one of 5 in the world) and the provider of Certified for Microsoft Dynamics (CfMD) quality assurance for Microsoft, Partners and ISVs across the world. 1ClickFactory is on the forefront of the Dynamics technologies and are helping our partners move forward into the Cloud.

We are looking for a senior developer to add to our large Dynamics 365/NAV team. As a senior developer you will be running projects and managing the quality of the development deliverables that we provide to our partners and ISVs. As a person you like building good solutions, working with different people on different projects, learning new technologies, sharing your knowledge with your colleagues and taking ownership of the satisfaction of your clients.

We are a tools-driven company and you will have the opportunity to create new or improve the existing tools that we have a vision to share with partners across the world.

As a company we have an open Nordic culture, with high level of freedom coupled with distributed responsibility. It is a place where different opinions are valued as they help us create the best solutions for the Microsoft Partners we serve. We are proud to grow the competences of our people as our company continues to grow.

Your role will include:

- Developing Microsoft Dynamics NAV with C\SIDE language
- Microsoft Dynamics 365 Business Central extensions with AL language according to technical documentation
- Technical documentation preparations and solution architecture
- Participating in Microsoft Dynamics NAV/ 365 Business Central upgrade projects, including:
 - Merging the code between different NAV versions
 - Transformation and redesigning of objects from Classic client to RTC
 - Data migration of database, testing and suggesting future improvements

What we offer:

- Work with one of the best Dynamics 365/NAV teams in the world
- Participation in different types of projects and assignments
- Flexible working hours

What we expect from you:

- More than 5 years of development experience with Microsoft Dynamics NAV
- Deep knowledge of MS NAV functionality
- Basic knowledge of accounting standards would be an advantage
- Basic knowledge of Microsoft SQL server implementation and maintenance
- Good spoken and written English
- Willingness to share your knowledge and experience with your colleagues
- Ability to work independently as well as in a team

- Informal and social working environment in a fast-growing IT organization
- Professional development opportunities
- Participation in international conferences
