

Apps & Extensions development for D365 Finance & Operations

Since the introduction of Microsoft Dynamics AX, modifications have involved the use of either overlaid code or Extensions. While overlaid code is the common approach to customization, it is often the source of frustration when moving from one release to the next due to the expensive development time required for conflict resolutions, testing, etc. To stem these undesirable factors, all solution modifications in Dynamics 365 for Finance and Operations [Enterprise Edition] is now only possible through Extensions.

During this two-days Extensions and Apps Development for Dynamics 365 [Enterprise Edition] Workshop for developers, created by 1ClickFactory, you will learn all about Extensions and App Development, including a LIVE hands-on workshop component to test your learnings.

This exclusive workshop will cover:

- Be introduced to Extensions in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition product.
- Gain on-hand experience in creating Metadata and Code extensions in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition.
- Be introduced to the newest extensibility techniques in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition product.
- Get to know the basic technical principle on how an overlaid Microsoft Dynamics 365 for Finance and Operations, Enterprise edition solution is moved to extensions.

The training is a mix of presentations, discussion and practical tasks.

Recommended attendees: experienced Microsoft Dynamics AX developers and technical consultants.

Workshop outcome: Based on this course, participants will get full and deep technical knowledge of extensibility features in the new Microsoft Dynamics 365 for Finance and Operations, Enterprise edition product. They will gain hands-on experience in extension based development related areas in Microsoft Dynamics 365 for Finance and Operations, Enterprise edition.

Let the Partners speak....

„Overlaying is going to be terminated: as from the end of spring 2018, the code in Dynamics 365 will have to be designed and developed on Extensions. We wanted to make sure we were ready for this change therefor we joined the 1ClickFactory workshop.“ Egidijus Žaromskis, Development Group Manager, Blue Solutions, Lithuania

“Not only is Ignas Stockus a great instructor with perfect communication skills and a good sense of humor, he is also an advanced developer with a lot of practical experience. His support and advice during the lab exercises were extremely valuable.” Vladislav Novy, AX Programmer, BlueDynamic, Czech Rep.

“We are focusing on D365 for Operation so participation in 1ClickFactory led workshops were very valuable and efficient for us” Andrejs Pidhačnijs, Division Manager, SQUALIO Business Solutions, Latvia.
